

SHURSTIK 306

Typical Characteristics:

Appearance	Red Heavy Liquid
Solids	66.0%.
Density	12.0
Flash Point	-4°F (T.C.C.)
Tensile	90 p.s.i. (1 hour @ 68° F

PRODUCT DESCRIPTION:

SHURSTIK 306 is a proprietary blend of solvents, fillers, adhesives and suspension agents.

SHURSTIK 306 is a product designed to meet the increasing demands of higher production rates and efficiency.

SHURSTIK 306 exhibits excellent strength with short periods of set time.

FEATURES:

- Excellent Strength
- Excellent Stability in Container
- Good Visibility
- Fast Drying

PACKAGING:
Quarts
